

VictoryShares US Small Mid Cap Value Momentum ETF

As of September 30, 2025

ABOUT USVM

Offers broad U.S. small-cap equity exposure using a risk-weighted multi-factor strategy.

Seeks investment results that track the performance of the Nasdaq Victory US Small Mid Cap Value Momentum Index before fees and expenses.

Value Momentum Methodology

A multi-factor strategy that seeks higher exposure to value and momentum factors with a focus on maintaining moderate turnover and lower volatility.

ABOUT THE INDEX

- Starts with the Nasdaq US 1300 Small Mid Cap Index
- Screens for the target factors—value and momentum—and then selects the top 25% of stocks based on a proprietary value-momentum factor score
- Stocks are weighted such that those with lower realized volatility are given higher Index weights.

WHY USVM?

- Offers broad U.S. equity market exposure—targeting small-cap U.S. stocks
- Seeks long-term excess risk-adjusted returns
- Targets a balanced risk contribution from the stocks in the portfolio by weighting stocks according to volatility (risk). Stocks with higher risk have lower weights.

About VictoryShares

Past performance does not guarantee future results. The performance data quoted represents past performance and current performance may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month-end, visit www.victoryshares.com. ETF shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Market price returns are based on price of the last reported trade on the fund's primary exchange. If you trade your shares at another time, your return may differ. Returns include

reinvestment of dividends and capital gains. Performance for periods greater than one year is annualized. Performance may reflect certain past fee waivers and/or expense reimbursements, without which performance would have been lower. Net expense ratio reflects the contractual waiver and/or reimbursement of management fees through October 31, 2025. Performance information for the Fund prior to July 1, 2019, reflects the historical performance of the USAA MSCI Small Cap Value Momentum Blend Index ETF, a series of USAA ETF Trust, managed by USAA Asset Management Company (the "Predecessor Fund"). The Fund's performance has not been restated to reflect any differences in expenses paid by the Predecessor Fund and those paid by the Fund.

Carefully consider a fund's investment objectives, risks, charges and expenses before investing. To obtain a prospectus or summary prospectus containing this and other important information, visit www.vcm.com/prospectus. Read it carefully before investing.

All investing involves risk, including the potential loss of principal.

The Fund has the same risks as the underlying securities traded on the exchange throughout the day. ETFs may trade at a premium or discount to their net asset value. Index Funds invest in securities included in, or representative of securities included in, the Index, regardless of their investment merits. The performance of the Fund may diverge from that of the Index. Investments in small- and mid-sized companies typically exhibit higher volatility. Momentum investing may be more volatile than other investments. Momentum can turn quickly and the fund may experience significant losses if momentum stops, turns or behaves differently than predicted. The Fund may frequently change its holdings, resulting in higher fees, lower returns, and more capital gains. The value of your investment is also subject to geopolitical risks such as wars, terrorism, trade disputes, environmental disasters, and public health crises; the risk of technology malfunctions or disruptions; and the responses to such events by governments and/or individual companies.

Fund holdings and sector allocations are subject to change, may differ from the Index, and should not be considered investment advice.

Price-to-Earnings ratio is the price of a stock divided by its earnings per share. **Market capitalization** is the total dollar value of all outstanding shares computed as number of shares times current market price. **Market price** is the price of the last reported trade on a fund's primary exchange. **Net asset value or NAV** is a fund's total assets minus its total liabilities, divided by the number of outstanding shares. **Premium/discount** % indicates whether an ETF is currently trading at a higher or lower price than the current value of the securities in that portfolio. **R-squared** is a statistical measure that represents the percentage of a fund's or security's movements that can be explained by movements in a

benchmark index. **Sharpe ratio** is the average return earned in excess of the risk-free rate per unit of volatility or total risk. **Standard deviation** measures an investment's historical volatility, calculated using the investment's annual rate of return.

*The Blended-Nasdaq Victory US Small Mid Cap Value Momentum Index/MSCI USA Small Cap Select Value Momentum Blend Index performance reflects that of the MSCI USA Small Cap Select Value Momentum Blend Index the Fund's prior index, through November 1, 2022, and the Nasdaq Victory US Small Mid Cap Value Momentum Index from November 1, 2022, onward.

The Nasdaq US Small Mid Cap 1300 Index is a float adjusted market capitalization-weighted index designed to track the performance of securities in Nasdaq US Benchmark Index that comprise the Small-cap segment of companies.
