

Q1 // MARCH 31, 2025

FUND FACTS

Class	Inception Date	Ticker	Expense Ratio: Gross	Net
Fund	07/12/13	UGMVX	1.24%	0.90%
Inst	07/31/08	UGOFX	0.77%	0.70%

Net expense ratio reflects the contractual waiver and/or reimbursement of management fees through August 31, 2025.

Investment Style

World Large Stock

Investment Objective and Strategy

The Fund seeks to attain long-term capital appreciation while attempting to reduce volatility during unfavorable market conditions. The Fund primarily invests in domestic and foreign equity securities, including emerging markets securities. At times, the Fund may be fully invested in ETFs, including shares of affiliated ETFs. The Fund uses a quantitative investment strategy that focuses investment factors such as momentum, value, quality and low volatility.

About the Fund

- Growth potential from U.S. and foreign markets.
- May employ innovative risk management strategies.
- Actively managed for you.

Portfolio Managers

Mannik Dhillon, CFA, CAIA. Since 2019.
Lance Humphrey, CFA. Since 2016.

PERFORMANCE

Average Annual Total Returns (%)

As of March 31, 2025	Q1 2025	YTD	1 Year	3 Year	5 Year	10 Year	Since Inception

Past performance does not guarantee future results. The performance quoted represents past performance and current performance may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month-end, visit www.vcm.com. Returns include reinvestment of dividends and capital gains. Performance for periods greater than one year is annualized. Fee waivers and/or expense reimbursements were in place for some or all periods shown, without which, fund performance would have been lower. High, double-digit returns are highly unusual and cannot be sustained. Investors should be aware that these returns were primarily achieved during favorable market conditions.

Growth of a Hypothetical \$10,000 Investment Fund Shares (3/31/2015–3/31/2025)

MORNINGSTAR RATINGS AND RANKINGS

	Overall	3 Year	5 Year	10 Year
Morningstar Rating	★★★	★★★	★★★	★★
Morningstar Ranking (%)	—	40	66	78
# of Funds	305	305	286	191

Morningstar Category: Global Large-Stock Blend. Morningstar ratings and rankings are based on the Fund share class.

The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable)

Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Morningstar percentile ranking is based on a fund's average annual total return (excluding sales charges) relative to all funds in the same category. The highest (most favorable) percentile rank is 1%, and the lowest (least favorable) percentile rank is 100%. Fund performance used for the rankings reflects certain fee waivers, without which, Morningstar rankings would have been lower and Morningstar ratings may have been lower.

Carefully consider a fund's investment objectives, risks, charges and expenses before investing. To obtain a prospectus or summary prospectus containing this and other important information, visit www.vcm.com/prospectus. Read it carefully before investing.

Not all share classes are available to all investors.

All investing involves risk, including the potential loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Derivatives may not work as intended and may result in losses. The fund is also subject to liquidity risk, which is the risk that the Adviser may not be able to sell a security at an advantageous time or price, which may adversely affect the Fund. The value of your investment is also subject to geopolitical risks such as wars, terrorism, environmental disasters, and public health crises; the risk of technology malfunctions or disruptions; and the responses to such events by governments and/or individual companies.

Active Share is a measure that compares the proportion of security holdings within the product against those of the respective benchmark. The value represents the percentage difference between fund and benchmark.

Market Capitalization is the total dollar value of all outstanding shares computed as number of shares times current market price. **Alpha** is the excess return of a fund relative to the return of a benchmark index. **Beta** is a measure of the volatility, or systematic risk, of a security or portfolio

relative to the market or a benchmark. **R-squared** is a statistical measure that represents the percentage of a fund's or security's movements that can be explained by movements in a benchmark index. **Standard Deviation** measures an investment's historical volatility, calculated using the investment's annual rate of return. **Portfolio Turnover Ratio - LTM** measures trading activity in a portfolio for the past year, indicating how often investments are bought and sold. **Average Price/Earnings (P/E) Ratio** is the current share price of a stock divided by its earnings per share.

The MSCI All-Country World Index (ACWI) is a free float-adjusted, market-capitalization-weighted index designed to measure the performance of large- and mid-cap stocks across developed and emerging markets.
