A VICTORY CAPITAL® INVESTMENT FRANCHISE

**INCORE** | CAPITAL MANAGEMENT<sup>SM</sup>

INDEPENDENT • COMPREHENSIVE • REPEATABLE

## Quarterly Fact Sheet

As of September 30, 2018

### INVESTMENT STRATEGY

At least 80% of the value of the Fund's net assets is normally invested in different kinds of debt securities such as corporate bonds, mortgage backed and asset-backed securities, and obligations of the U.S. government and its agencies. The Fund usually targets an average duration within a range of 1 and 3 years, with an average maturity of 1 to 3 years. The Fund invests among the various sectors of the debt markets by analyzing overall economic conditions within these sectors. The Fund usually diversifies its asset allocations among the debt securities market, but may emphasize some sectors over others based on their attractiveness relative to each other.

**Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month end, please call 1-800-539-FUND or visit [www.vcm.com](http://www.vcm.com).** Annualized return or average annual return describes the return gained, on average, each year of a multi-year period rather than a cumulative return. Returns are historical and include the change in share price and reinvestment of dividends and capital gains distributions, if any. Performance for Qtr and YTD are cumulative. Class A Shares MOP performance figures reflect a maximum sales charge of 2.00%.

### Growth of \$10,000 - Class A Shares 09.30.08 - 09.30.18

THE LINE GRAPH REPRESENTS THE PERFORMANCE OF A HYPOTHETICAL \$10,000 INVESTMENT IN THE FUND AFTER THE DEDUCTION OF ALL EXPENSES AND THE REINVESTMENT OF DIVIDENDS AND CAPITAL GAINS, IF ANY. THE RETURNS DO NOT, HOWEVER, REFLECT THE DEDUCTION OF TAXES THAT A SHAREHOLDER WOULD PAY ON FUND DISTRIBUTIONS OR UPON REDEMPTION OF FUND SHARES AND DO NOT REFLECT THE DEDUCTION OF SALES CHARGES (LOADS). IF THEY DID, THE RETURNS WOULD BE LOWER THAN THOSE SHOWN.

\*The Adviser has contractually agreed to waive a portion of its management fee and/or reimburse certain expenses through at least July 31, 2018. The Adviser is permitted to recoup fees waived/expenses reimbursed for up to 3 years after the fiscal year in which the waiver/reimbursement took place, subject to certain limitations. Please read the prospectus for details.

There is no guarantee that the Fund will achieve its objective. The return of principal in bond funds is not guaranteed. The principal value of a bond falls when interest rates rise and rises when interest rates fall. During periods of rising interest rates, the value of a bond investment is at greater risk than during periods of stable or falling rates. Bond funds have the same interest rate, inflation, reinvestment, credit and prepayment risks associated with the underlying bonds in the portfolio.

Target metrics reflect our stated goals and are not absolute limits as these are affected by various factors like market fluctuations.

Benchmark: The Bloomberg Barclays U.S. 1-3 Year Government Bond Index is generally considered to be representative of U.S. Government bonds with maturities between one and three years. The Bloomberg Barclays U.S. 1-3 Year Government Bond Index is an unmanaged index that is not available for direct investment and there are no expenses associated with the index while there are expenses associated with the Fund.

Credit Quality Ratings: Credit quality ratings are obtained using Bloomberg Barclays methodology using ratings derived from Moody's Investors Service (Moody's), Standard & Poor's (S&P) and Fitch Ratings (Fitch). When ratings from all three agencies are available, the median rating is used. When ratings are available from two of the agencies, the lower rating is used. When one rating is available, that rating is used. Victory Capital Management does not evaluate these ratings, but simply assigns them to the appropriate credit quality category as determined by the rating agency.

Characteristics Defined: Source: Victory Capital Management Inc. Fixed Income Team. Average Life: The weighted average life (WAL) or number of years for which each dollar of unpaid principal on a loan or mortgage remains outstanding. Once calculated, WAL tells how many years it will take to pay half of the outstanding principal. Duration: A weighted average of the maturity of all the income streams from a bond or portfolio of bonds. Generally, the higher the duration, the more sensitive the bond or bond portfolio to changes in interest rates.

30 Day Standardized Yield: A standard yield calculation developed by the SEC for bond funds. The yield is calculated by dividing the net investment income per share earned during the 30-day period by the maximum offering price per share on the last day of the period. The yield figure reflects the dividends and interest earned during the 30-day period, after the deduction of the fund's expenses. It is sometimes referred to as "SEC 30-Day Yield" or "standardized yield". Subsidized 30-Day SEC Yield is based on a 30-day period ending on the last day of the previous month and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. If the fund expenses have waivers, the subsidized yield is based on the net expenses. Unsubsidized 30-Day SEC Yield is based on total expenses of the fund.

Fund Holdings and Duration Schedule: Fund holdings and duration are as of quarter end and may change at any time.
