

FUND FACTS

Investment Style

All-Cap Value

Investment Objective

Long-term capital appreciation

Investment Strategy

The Fund invests in securities that the RS Value Team believes are undervalued. The Fund will typically invest most of its assets in equity securities of small-, mid-, or large-cap companies. The Fund may invest in securities of issuers located globally, and may invest any portion of its assets outside of the U.S. The Fund will likely hold a more limited number of securities than other mutual funds. The Fund's investment team conducts fundamental research to identify companies with improving returns on invested capital.

Investment Team

The RS Value team searches for good businesses led by strong management teams, and invests when a stock's price reflects an attractive valuation. We believe this approach will result in superior long-term risk-adjusted returns.

Returns include reinvestment of dividends and capital gains. Performance for periods greater than one year are annualized.

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month-end, visit www.vcm.com.

Returns with sales charge include the maximum sales charge of 5.75%. Net Asset Value (NAV) returns exclude this charge, which would have reduced returns.

An investor should consider the fund's investment objectives, risks, charges and expenses carefully before investing or sending money. This and other important information about the fund can be found in the fund's prospectus, or, if applicable, the summary prospectus. To obtain a copy, visit www.victoryfunds.com. Read the prospectus carefully before investing.

All investing involves risk, including potential loss of principal. There is no guarantee that the Fund will achieve its objective. Investments in small and mid-size companies can involve risks such as less publicly available information, higher volatility, and less liquidity than larger companies.

Not all share classes are available to all investors. Please read the prospectus for details.

Active Share is a measure that compares the proportion of security holdings within the product against those of the respective benchmark. The value represents the percentage difference between fund and benchmark. **Alpha** is the excess return of a fund relative to the return of a benchmark index. **Beta** is a measure of the volatility, or systematic risk, of a security or portfolio relative to the market or a benchmark. **R-squared** is a statistical measure that represents the percentage of a fund's or security's movements that can be explained by movements in a benchmark index.

Turnover – Last 12 Months (LTM) is a measure of trading activity in a mutual fund portfolio of investments for the past year that indicates how often investments are bought and sold. **Information Ratio** is a measure of the value added per unit of active risk by a manager over the benchmark. The Information Ratio is calculated by dividing the annualized excess return over a benchmark by the annualized standard deviation of excess return. **Sharpe ratio** is the average return earned in excess of the risk-free rate per unit of volatility or total risk.

The Russell 3000® Value Index is an unmanaged market-capitalization-weighted index that measures the performance of those companies in the Russell 3000® index with lower price-to-book ratios and lower forecasted growth values.

A Fund's portfolio differs significantly from the securities held in an index. An index is unmanaged and not available for direct investment.

The Funds are distributed by Victory Capital Advisers, Inc., member FINRA and SIPC, an affiliate of Victory Capital Management Inc.
