Does history repeat, or at least rhyme?

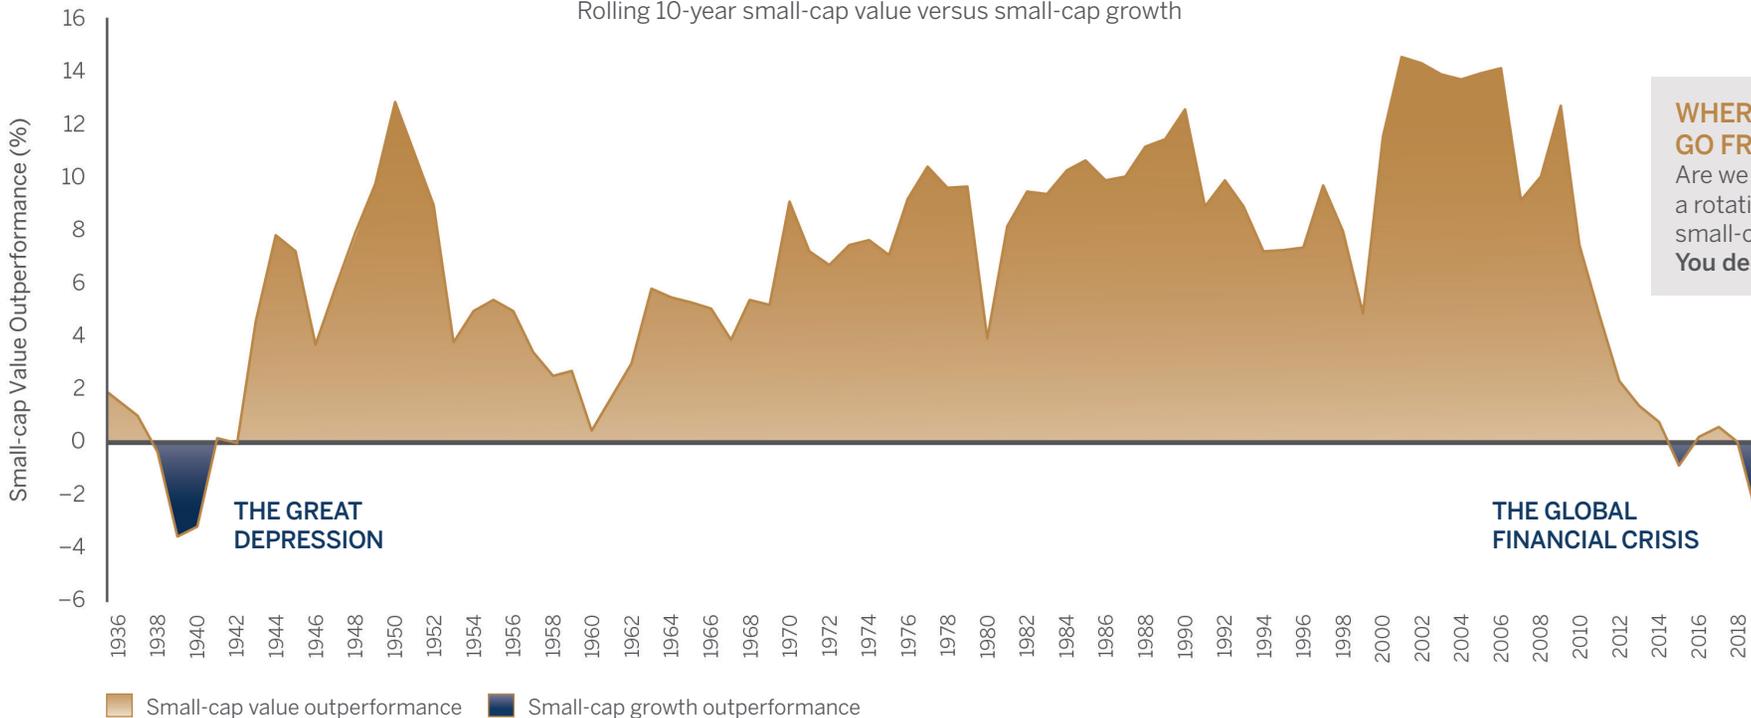

Sure, small-cap value strategies have lagged their growth counterparts in recent years. But investors would be wise to view performance—and potential—through a longer-term lens.

ROLLING 10-YEAR PERFORMANCE OF SMALL-CAP VALUE VERSUS SMALL-CAP GROWTH *Annual returns from 1927 through 2019*

Small-cap value stocks have outperformed small-cap growth stocks 93% of the time on a rolling 10-year basis. There have been only two exceptions to this long-term trend, once around the Great Depression and more recently in the decade following the Global Financial Crisis.

Historically, small-cap value has outperformed small-cap growth

WHERE WILL WE GO FROM HERE?
Are we poised for a rotation back to small-cap value?
You decide.

These portfolios are constructed with U.S. equities listed on NYSE, AMEX, and NASDAQ. The 6 Fama French portfolios define small cap stocks as below the median NYSE market capitalization. In addition, equities with small capitalizations (as outlined above) with the highest Book to Market ratios are considered small cap value. Equities with small capitalizations with the lowest Book to Market ratios are considered small cap growth.

Style rotation?

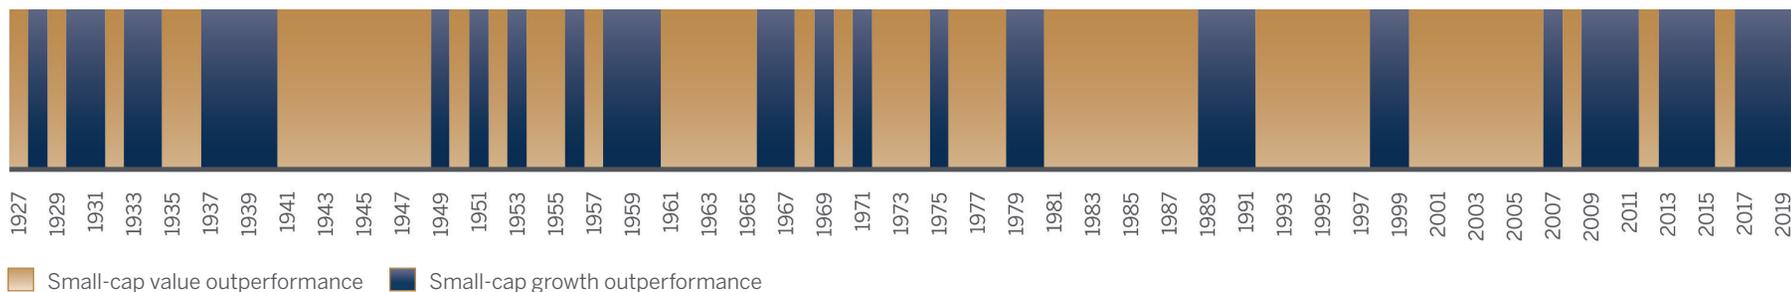

COMPARING ANNUAL RETURNS OF SMALL-CAP VALUE VERSUS SMALL-CAP GROWTH *Annual returns from 1927 through 2019*

Don't fall prey to recency bias. It's true that on an absolute basis, small-cap growth has outperformed small-cap value over the past three calendar years. But it's also true that, small-cap growth has only outperformed its value counterpart on four consecutive years just once, between 1937-1940. In fact, the

recent run of small-cap value outperformance is the longest such stretch since the Great Depression. This leads to an obvious question: Are we on the cusp of an inflection point and rotation back toward small-cap value?

Which style has outperformed over the long term?

The chart below illustrates that small-cap value strategies have had better annual returns than small-cap growth strategies the majority of years.
