R6	12/01/16	URGSX	0.51%	0.35%

Net expense ratio reflects fee waivers, reimbursements or recoupment, as applicable, contractually agreed to through June 30, 2021.

Investment Style

Intermediate Government

Investment Objective and Strategy

The Fund seeks a high level of current income consistent with preservation of principal. The Fund normally invests at least 80% of its assets in securities issued by the U.S. government, its agencies and instrumentalities, including Treasury bills, notes, and bonds; Treasury Inflation Protected Securities; mortgage-backed securities backed by the Government National Mortgage Association, the Federal National Mortgage Association, and the Federal Home Loan Mortgage Corporation; collateralized mortgage obligations; and repurchase agreements collateralized by such investments.

About the Fund

- Provides potential income you can take or reinvest.
- No credit risk.
- Higher income potential than U.S. Treasuries.

Portfolio Managers

Jim Jackson, CFA. Since 2019.
Neal Graves, CFA, CPA. Since 2013.

Returns include reinvestment of dividends and capital gains. Performance for periods greater than one year are annualized.

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month-end, visit www.usaa.com.

Fee waivers and/or expense reimbursements were in place for some or all periods shown, without which, fund performance would have been lower.

Growth of a Hypothetical \$10,000 Investment Fund Shares (6/30/2010–6/30/2020)

MORNINGSTAR RATINGS AND RANKINGS

	Overall	3 Year	5 Year	10 Year
Morningstar Rating	★★★	★★★	★★★	★★★
Morningstar Ranking (%)	–	48	53	62
# of Funds	222	222	197	162

Morningstar Category: Intermediate Government
Morningstar ratings and rankings are based on the Fund share class.

The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable)

Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Morningstar percentile ranking is based on a fund’s average annual total return (excluding sales charges) relative to all funds in the same category. The highest (most favorable) percentile rank is 1%, and the lowest (least favorable) percentile rank is 100%. Fund performance used for the rankings reflects certain fee waivers, without which, Morningstar rankings would have been lower and Morningstar ratings may have been lower.

Credit Quality (% Fund)

Top 5 Sectors (% Fund)

Consider the investment objectives, risks, charges and expenses of the USAA Mutual Funds carefully before investing. To obtain a prospectus or summary prospectus containing this and other important information visit www.usaa.com/prospectus. Read it carefully before investing.

Not all share classes are available to all investors.

All investing involves risk, including potential loss of principal. An investment in the Fund(s) is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Bonds and bond funds decrease in value as interest rates rise. Inflation protected bonds typically have lower yields than conventional fixed rate bonds and will likely decline in price during periods of deflation, which could result in losses. Mortgage-backed securities (“MBS”) are subject to credit, prepayment and extension risk and may react differently to changes in interest rates than other bonds. Small movements in interest rates may quickly and significantly reduce the value of certain MBS. Small movements in interest rates may quickly and significantly reduce the value of certain MBS.

Credit Quality Ratings table reflects the highest long-term rating from a Nationally Recognized Statistical Rating Organization (NRSRO), with the four highest long-term credit ratings labeled, in descending order of credit quality, AAA, AA, A and BBB. These categories represent investment-grade quality. The credit ratings shown are provided by Standard & Poor’s, Moody’s Investors Service, Fitch Ratings, and A.M. Best. Ratings apply to the credit worthiness of the issuers of the underlying securities and not to the fund or its shares. Ratings are subject to change. **Average Effective Duration** provides a measure of a fund’s interest-rate sensitivity. The longer a fund’s duration, the more sensitive the fund is to shifts in interest rates.

Subsidized Yield reflects the current fee waiver. **Unsubsidized Yield** represents what the Yield would have been without the current fee waivers and/or expense limitations.

The unmanaged Bloomberg Barclays U.S. Aggregate Government Intermediate & MBS Index (BBgBarc US Agg Gov Int & MBS) consists of intermediate U.S. Treasury and Agency unsecured notes and securities backed by pools of mortgages issued by U.S. Government Agencies, GNMA, Fannie Mae, or Freddie Mac.
