### Investment Style

Technology

### Investment Objective and Strategy

The Fund seeks long-term capital appreciation. The Fund normally invests at least 80% of its assets in equity securities of companies expected to benefit from the development and use of scientific and technological advances and improvements. The Fund may invest up to 50% of its assets in foreign securities, including securities issued in emerging markets.

### About the Fund

- Focus on science and technology stocks provides long-term growth potential.
- May be suitable for the more aggressive portion of a balanced portfolio.
- Includes both new and established companies.

### Portfolio Managers

Stephen Bishop. Since 2019.  
 Christopher Clark, CFA. Since 2019.

Returns include reinvestment of dividends and capital gains. Performance for periods greater than one year are annualized.

**Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month-end, visit [www.usaa.com](http://www.usaa.com).**

Fee waivers and/or expense reimbursements were in place for some or all periods shown, without which, fund performance would have been lower.

### Growth of a Hypothetical \$10,000 Investment Fund Shares (6/30/2010–6/30/2020)

## MORNINGSTAR RATINGS AND RANKINGS

	Overall	3 Year	5 Year	10 Year
Morningstar Rating	★★★	★★★	★★	★★★★
Morningstar Ranking (%)	–	62	72	35
# of Funds	197	197	175	150

Morningstar Category: Technology

Morningstar ratings and rankings are based on the Fund share class.

The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable)

Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Morningstar percentile ranking is based on a fund's average annual total return (excluding sales charges) relative to all funds in the same category. The highest (most favorable) percentile rank is 1%, and the lowest (least favorable) percentile rank is 100%. Fund performance used for the rankings reflects certain fee waivers, without which, Morningstar rankings would have been lower and Morningstar ratings may have been lower.

Not all share classes are available to all investors.

**All investing involves risk, including potential loss of principal.** All investing involves risk, including potential loss of principal. In addition to the normal risks associated with investing, narrowly focused investments typically exhibit higher volatility. Science and technology companies may be subject to economic downturns, short product cycles, severe competition, product obsolescence and government regulation. Non-U.S. investments may involve risk of capital loss from unfavorable fluctuations in currency values, differences in generally accepted accounting principles, or economic or political instability. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume.

**Active Share** represents the proportion of security holdings within the product compared to the respective benchmark. **Alpha** is the excess return of a fund relative to the return of a benchmark. **Beta** measures the volatility, or systematic risk, of a security or portfolio relative to the market or a benchmark. **R-squared** represents the percentage of a fund's or security's movements that can be explained by movements in a benchmark index. **Standard deviation** measures an investment's historical volatility, calculated using the investment's annual rate of return. **Portfolio Turnover Ratio - LTM** measures trading activity in a portfolio for the past year, indicating how often investments are bought and sold. **Average**

**Price/Earnings - NTM** is a ratio for valuing a company that measures its current share price relative to its per-share earnings.

**The S&P 500® Index** is a market capitalization-weighted index that measures the performance of the common stocks of 500 leading U.S. companies. **The S&P North American Technology Sector Index™ (S&P NA Tech Sector)** is a modified capitalization-weighted index based on a universe of technology-related stocks.
